

Internet Censorship

SOPA

and

Protect IP

Internet Censorship

Proposed bills SOPA and Protect IP will allow entire websites to be blocked on the basis of complaint (SOPA §102).

Disguised as "anti-piracy" neither bill would prevent actual pirate websites, which could simply reappear hours later under a different name.

Congress will vote on **Jan. 24, 2011**. — *Stop it while there is still time!* Visit: americancensorship.org.
